

INTRODUCING THE SALES SKILLS INDEX

The Sales Skills Index is an objective analysis of your sales reps' understanding of the strategies required to sell successfully in any sales environment. It essentially answers the question, "Can this person sell?" Like any profession, selling has a body of knowledge related to its successful execution. It is this knowledge that the Sales Skills Index measures.

Although dealing with the issue of whether a person can or cannot sell is an essential component in predicting or improving sales success, it is certainly not the only one required for optimum sales performance. Behavior, attitude, and personal interests and values are other areas to consider. (FocalPoint has alternative assessments for these areas).

Understanding effective sales strategy can help lead your sales team to success as long as you can implement it. However, just knowing it is not enough, you must utilize what you know.

The Sales Skills Index report will give you feedback on your team member's sales strengths and sales weaknesses. From this you can customize an individual development plan to overcome these weaknesses. Knowledge of their strengths and weaknesses, along with their desire to sell more, will allow you to maximize the growth of their sales skills AND the revenue they generate!
